

VISUAL MEDIA DESIGN 105 IN DESIGN FINAL PROJECT

Lili Zhen

The reason I chose this lesson because my major is graphic design, and I want to transfer to CSU. Also this lesson is a necessary course for transfer. My career goal is to become a web designer. I used MS UI Gothic typeface with blue color in the introduction. And I used Monotype Corsiva, Times new roman and Tw Cen MT with black color for others. I want to reflect the simple tone as a whole, so I try to use blue and white for most areas.

PHOTOSHOP FINAL PROJECT

Lili Zhen

I had some experience with photoshop before this project. I learned a simple Photoshop operation because of my interest. It is not very difficult for me, and I spent less time to finish this project. But for me, what I want to do most is the rendering of the image. Especially in these aspects such as harmonic saturation.

ILLUSTRATOR FINAL PROJECT

Lili Zhen

I spent some time learning the basic operations of illustrator. I really like the character is drawn with illustrator, will look real. The theme of this project is McDonald's. Because I didn't have idea at the time, I wanted to make it when I saw McDonald's. I want to draw the food cuter than we usually see. Sometimes it is difficult for the operation of the anchor.

**ANIMATE
FINAL
PROJECT**
Lili Zhen

Hello ~ ~

This is my first time learning and using animate. Compared to Photoshop and Illustrator, this is more difficult than my imagined. It took me a lot of time to do this project. If you want to make a good animation project, you not only need more time, but also need relatively strong operational ability. Obviously, I felt that I am not good at this.
